

**We are sure you're wishing to go back to the beach this summer and have fun in the sea and the sand with your friends. Do not miss out on these essential tips so we can all continue to enjoy beaches forever:**

**1**

**Use recycling waste bins (packaging, paper, organic) or take waste home.**

**2**

**Take a bag to collect any rubbish you see on the sand or in the water.**

**3**

**Get used to the seaweed at the edge of the water. It is part of nature and it is also a home and a food source for animals.**

**4**

**Leave the shells and stones you find on the beach, as they are part of the ecosystem.**

**5**

**Respect the plants and animals of the beach and the sea.**

**6**

**Before leaving, remove the sand off your feet. The beach needs it and we do not!**

**7**

**Water from the shower and the washbasin is a scarce and valuable asset that we must save.**

**8**

**Always walk through the marked pathways. So you will always arrive to your destination**

**9**

**The dunes on the beach are plants' home. Do not walk over them.**

**10**

**Use public toilets, take care of them all. The sea is not a toilet!**

**Learn more about the marine environment, enjoy the beach with respect and come back soon!**
